

Training Announcement

Special Advisory 405-A

'Changes in Response to In-Station Diagnostic Alarms'

The California Air Resources Board (ARB) and local air districts are offering training sessions to provide guidance on Special Advisory 405-A, which addresses 'Changes in Response to In-Station Diagnostic (ISD) Alarms'. Special Advisory 405-A modifies air district enforcement policies to; (i) reduce the number of service calls required in response to winter season ISD over pressure alarms and (ii) increase the time allowed before a call for service is required in response to all types of ISD alarms. The amendments in Advisory 405-A will benefit gasoline dispensing facility operators by reducing the time and cost required to address ISD alarms.

Interested parties are invited to attend any one of the training sessions listed below. **Registration is not required.** Contact Melinda Weaver at (916) 322-8918 or (916) 327-0900 with any questions.
